Tasnim Chowdhury

tasnim.chowdhury@example.com · +880 1812 345 678 · github.com/tasnimc · tasnimc.dev · Dhaka, Bangladesh

Frontend developer who cares about the last 10%: loading states, keyboard navigation, and the error message you see when the Wi-Fi drops. One year shipping a React Native app used by 30,000 riders; before that, a lot of late nights on hackathon projects.

EXPERIENCE

Junior Frontend Developer · Kotha Mobility, Dhaka — Jun 2024 – Present

- Rebuilt the rider sign-up flow in React Native, cutting drop-off between the phone and OTP screens from 38% to 21%.
- Added offline support to the trip history screen with a local SQLite cache, so riders on 2G can still see their last 50 trips.
- Wrote the team's first accessibility checklist and fixed more than 40 issues flagged by TalkBack on Android.
- Paired with the backend team to move the fare estimate API from polling to WebSockets.
- Review about ten pull requests a week and run the Friday demo for the mobile team.

Software Engineering Intern · Brightcart, Dhaka — Jan 2024 – May 2024

- Built an internal dashboard in Next.js for tracking failed deliveries by area, now used daily by the operations team.
- Replaced a hand-written date picker with an accessible component library, removing 1,200 lines of code.
- Wrote Playwright tests for the checkout flow that caught two pricing bugs before release.

PROJECTS

Bus Koi · React, Mapbox, Firebase — 2023

- A live map of Dhaka's city buses built from rider check-ins; won second place at the Dhaka AI Hackathon 2023 out of 64 teams.
- Reached 2,300 users in its first month after a post in a university Facebook group.

Bangla Typing Tutor · TypeScript, Web Workers — 2022

- A browser game that teaches the Bijoy keyboard layout; open source, with 140 GitHub stars.

EDUCATION

B.Sc. in Computer Science and Engineering · Eastbridge University, Dhaka — 2020 – 2024

- CGPA 3.71 / 4.00; thesis on predicting bus arrival times from crowd-sourced GPS traces.
- Teaching assistant for Data Structures (CSE 220) for two semesters.

SKILLS

Languages: TypeScript, JavaScript, Kotlin (basic), SQL

Frontend: React, React Native, Next.js, Tailwind CSS, Redux Toolkit

Testing and tools: Jest, Playwright, Git, Figma, Firebase

ACTIVITIES

- Organiser, Women in Tech Dhaka (2023 – present): run monthly beginner workshops on Git and React.
- Speak Bangla (native), English (fluent) and Hindi (conversational).
